Controltac™ Graphic Film IJ380

The Ultimate Performance for the most Challenging Applications

3D Conformability Delivered

The Ultimate Performance for the most Challenging Applications

Combining the innovative 3M™ Controltac™ Graphic Film IJ380 with the equally new 3M™ Scotchcal™ Overlamine 8580 allows (digitally) printed graphics to be applied in deep contours and 3D corrugations commonly found on many van models. This practically removes all limits of graphic film application.

- Unprecedented 3D conformability
- No more film lifting
- Full wrapping of vans
- Perfect finish

Surface wrapped with Controltac™ Graphic Film IJ380 and 3M™ Scotchcal™ Overlamine Film 8580

- van body
- graphic film
- overlamine

Lasting adhesion also in deep corrugations.

Surface wrapped with conventional film

Typical graphic failure: film-lifting due to excess stress in the film.
